

Front-end development: Arrays

JavaScript – Library

The following exercise contains the following subjects:

- Array Methods

Instructions

Write a JavaScript function that receives the following library object as an input and displays the books that can be read (the reading status is true).

Log the book name, author name, and reading status.

```
const library = [  
  {  
    author: "Bill Gates",  
    title: "The Road Ahead",  
    readingStatus: true  
  },  
  {  
    author: "Steve Jobs",  
    title: "Walter Isaacson",  
    readingStatus: true  
  },  
  {  
    author: "Suzanne Collins",  
    title: "Mockingjay: The Final Book of The Hunger Games",  
    readingStatus: false  
  }  
];
```
