React: Mood change

React – Context

The following exercise contains the following subjects:
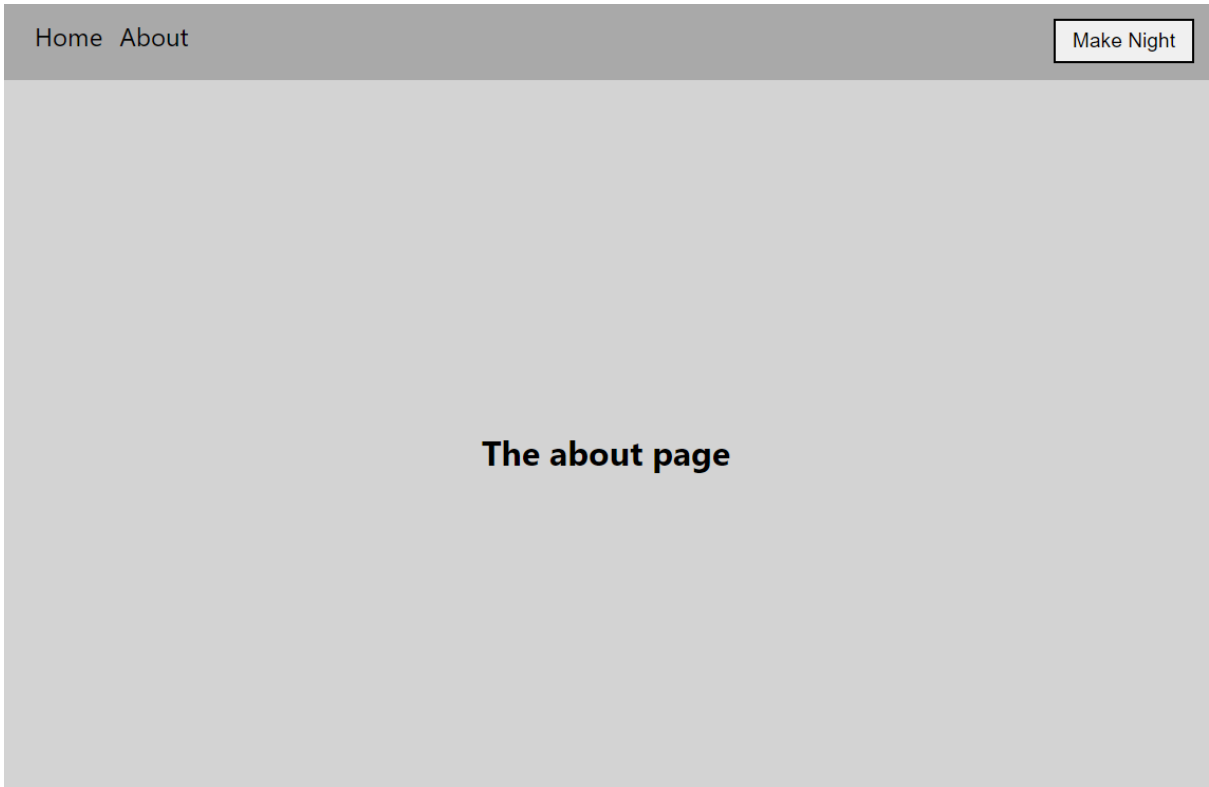

- Context

Instructions

Create an application with a top menu and two static pages, the top menu and each page will be a component.

In the top menu, create a toggle button that by clicking on it, will change the colors from day mode to night mode.

The toggle button can be in a normal state, however, to change the colors use only the context.

Example below:

Day Mode:

| Home About | Make Night |

The about page

Night Mode:

| Home About | Make Day |

The home page
