Front-end development: Elements

JavaScript – Selecting elements

The following exercise contains the following subjects:

- DOM

Instructions

Copy this HTML file (next page)

```html
<!DOCTYPE html>
<html lang="en">
  <head>
    <meta charset="UTF-8" />
    <meta http-equiv="X-UA-Compatible"
content="IE=edge" />
    <meta name="viewport"
content="width=device-width, initial-scale=1.0" />
    <title>Modifying Elements</title>
  </head>
  <style>
    h1 {
      color: red;
    }
    p {
      font-size: 20px;
    }
  </style>
  <body>
    <h1>
    I hate the color red. If only I was blue and I
can sing "Im blue da da di da da daaa"
    </h1>
    <p class="paragraph">I wish I was bigger</p>
    <div id="description">
      Select me and change my display property
    </div>
  </body>
<script>
//your js code here
</script>
```

inside the script tag do the following:

1. Change the h1 color to blue.
2. Change the paragraph to 30 px
3. Change the description to an inline-block
4. Change the body to a background color of green
5. Change the document title from "Modifying Elements" to something else.
