Front-end development: Promises

JavaScript – greater_than_10

The following exercise contains the following subjects:

- promises

Instructions

Write a function that takes a number as an argument and returns a Promise that tests if the value is less than or greater than the value 10.
If it is greater than 10 it is resolved, if it is less than 10 it is rejected.
Call the function and print the resolve and reject in a .then, .catch.
