Front-end development: Basics

JavaScript – declaring functions 1

The following exercise contains the following subjects:

- Declaring functions 1

Instruction

Copy the code below to your computer, answer the questions on the file, and submit.

```
/*
    JavaScript - Declaring Functions

    The following exercise contains the following
subjects:
        * functions

    Instructions
        * Please reformat the following function
declarations to function expression.
        * Please reformat the following function
expressions to function declarations.

    Submit the file to Hive
*/

// From function declarations to function expressions
```

```javascript
function welcome() {
    let welcome = 'Welcome to Appleseeds Bootcamp!';
    return welcome;
}
function power(a) {
    let myNumber = a;
    let result = Math.pow(myNumber, 2);
    return result;
}

function add(a, b = 5) {
    let myNumber = a;
    let sum = myNumber + b;
    return sum;
}

// From function expressions to function declarations
const hello = () => "Hello!";

const squareRoot = a => Math.sqrt(a);

const randomNumbers = (a, b) => Math.random() * (a - b) +
b;
```
