React: JSX

React – Hello World

The following exercise contains the following subjects:

- basics

Instructions

Learn first online how to use string interpolation in React. Then answer the questions below.

Create some JSX from the following variables:

1. ```js
   const data = ["hello", "world"];
   ```
   the output should be: **"Hello World"** notice the spacing!

2. ```js
   const number1 = 5;
   const number2 =6;
   ```
   The output should be: **5 + 6 = 11**

3. ```js
   const string = "I love React!"
   ```
   The output should be: **The string's length is <display the length of the string>**
